Installation method

01

02

1 Mark the hole position with pencil

2 Drill 3cm deep with a 6mm drill

3 Fix the bracket with expansion wire

4 Assemble, the decorative ending is 4cm away from the bracket

Size
recommendations

Warm tips: any size can be customized, if necessary, please contact customer service.

01

Reduce 2cm gap at both ends of the whole wall
For example: the whole wall is 380cm, and the total length of rod + ending is 376cm

fsciwow.en.alibaba.com

02

On the basis of the width of the window, there is about 30cm more on each side.
For example: the width of the window is 180cm, and the total length of the rod + ending is about 240cm.

03

It is suggested that one side next to the wall should be provided with sealing and the other side should be equipped with decorative ending, the length of the side with decorative ending is increased by about 30cm.

Length of Roman rod a = total width of window + 60cm

Length of Roman rod b = total width of wall - 4cm

Tips: the calculation formula of rod length has included the size of decorative ending! (customized products will not be returned or replaced if they are not the quality problems)

Company Profile

COMPANY INFORMATION

[Contact us](#)

◀ **About Us**

Foshan City Keewo Window Decoration Co., Ltd. was established in 2004, specializing in the production of curtain rods and accessories, curtain tracks, blinds, curtains.
